milestone Solution Partner

SMARTsoftware

For even more solution power

EET SECURITY

Bridging Milestone XProtect with your customer requirements.

Flexibility and Simplification

The Milestone SDK is a powerfull tool, which allows to go this extra mile to win a project.
EET Security has done this in the past and those development are available to solve your needs.
Simple Milestone Add-ons that may be exactly what your customer is looking for.

milestone XPROTECT®

Tablett Control

Control the Smart Client from a Tablett. Live and Playback.

HTML Control

Use HTML Sites to control your Smart Client.

Milestone Client

Milestone Smart Client Application.

Remote SDK

Control the Smart Client from a 3rd party application or create your own control interface using the easy SDK of the Remote Control Application for the Smart Client.

Analytics Integration

Flawless integration of edge based analytics. Get more value from your camera based analytics by bounding boxes and alarm information in the Smart Client.

Alarm Desktop

Simple Desktop Client for Receptionists that don't need the full Smart Client Functionality. Runs as a service in the background with Popup functionality.

Alarm Display

Use a simple Display Application instead of the Smart Client to show alarm or for a public Display.

Milestone Core

Milestone Recording, Event and Management Server.

Display Control

Visual configuration tool for the Smart Client to adjust the content that will be shown on the Alarm Display.

Analytics Integration

High level integration of on edge analytics. Setup the camera analytic function inside the Milestone Management Client.
